

ACCESSORIES - ELEMENTS

There are three types of element you can use with your towel rail; a manual electric element and two thermostatic electric elements. Use a T-Piece to enable the towel rail to be dual fuel - electric and hot water. Dual fuel valves and t-pieces can be found opposite.

How to choose your Element

It is important to select the correct size element for your towel rail. Too small and it will not provide enough heat, too large and it can burn out.

The chart opposite will help you choose the right size element; we have listed the towel rail output in watts and the corresponding recommended size of element.

Towel Rail output range in Watts	Electric Elements
165 - 255	200w
260 - 375	300w
